PROFILE

Marketer who builds the automations himself. In 2026 I designed, shipped and maintained AI workflows for marketing and lead generation clients: Claude Code agents and Python scripts that collect data from public sources and APIs, qualify and enrich it, draft personalised messages and report the results, with automated checks, logs and a human review before anything reaches a client. I document each workflow so it can be rerun and handed over: a robust solution over a quick hack.

HIGHLIGHTS

- **End-to-end automation, measured:** for a Milan performance-marketing agency, a pipeline from Meta Ad Library advertisers to qualified leads: 379 ads to 127 unique companies to 48 deliverable leads (12.7% yield, up from 10.6% on the first run in about 27 machine minutes).
- **Error handling by design:** 10 automated gates re-read every delivered field (ID, domain, VAT, address, phone, contact name) from the saved source page; a lead that fails is dropped, never guessed; a reviewer agent and I check before delivery.
- **Resilient long runs:** for a fitness coach, screened 10,000 Instagram followers into a shortlist: resumable output, backoff and a circuit breaker on rate limits; client feedback led to stricter criteria and a sample check.

EXPERIENCE

Freelance Social Media & Growth Specialist | *Independent, remote (IT/EU) | 2020 – Present*

- Since 2026: AI automation for marketing and lead generation clients (agencies, web studios, a coach) in Italy and the EU: data sourcing, enrichment, email verification (DNS, SPF/DMARC), personalised drafts and reporting, built in Python with Claude Code and REST APIs (API-key auth, JSON, rate limits).
- Cloud scheduling: a daily GitHub Actions workflow ran an email campaign from one state file, with logs and inbox checks against silent failures.
- Since 2020: social media, content and copywriting for local businesses, brands and events.

Art Direction & Social Visuals | *Discotti, independent DJ collective (Naples–Paris) | Jul 2026 – Present*

- AI design workflow for flyers and social visuals: AI image generation under my art direction, one master per event exported to post, story and 300-ppi print formats; visuals used for the 2nd-anniversary campaign.

Social Media Manager | *Wave Events, Malta (on-site) | Jun 2026 – Oct 2026*

- Ran Instagram, TikTok and Facebook for a live-events network in English; weekly changes based on data.

Marketing & Copywriting (Internship) | *Crafton Agency, Poznań (PL) | Jan 2026 – May 2026*

- SEO articles and social copy in English for B2B tech clients; turned the editorial guidelines into a reusable Claude skill. Recommendation letter from the Director of Business Development.

SKILLS

- **AI & automation:** Claude, Claude Code (skills, subagents, MCP, hooks), ChatGPT, Gemini; Python, REST APIs and webhooks, JSON, GitHub and GitHub Actions, Playwright, Apify; model choice by task and cost
- **Quality & safety:** validation gates, logging, resumable runs, sample checks, human sign-off, GDPR-aware data handling, secrets kept out of code
- **Marketing & web:** SEO copywriting, landing-page copy, PageSpeed audits, GEO checks (prototype), AI image generation, HTML/CSS
- **In progress:** n8n Academy (N8N101–103), HubSpot Inbound and Marketing Hub, Google Analytics, Anthropic Academy: Claude Code in Action
